Abstract Urban renewal and economic revitalization is always a hot topic for public officials, regardless of whether they are at the municipal, county, state or federal levels of government. That is certainly the case in New York. With tight budgets and a growing understanding that government cannot and should not undertake all of the burdens associated with economic development also comes a recognition that forming true public-private partnerships can foster the type of renaissance that neither could create on their own. Adapted from the source document.
